GAME DEVELOPMENT PROJECTS AND INTERNSHIPS

Brackey's Game Jam 2025.1

MIT, Manipal, India

Solo Game Developer

[Feb '25]

- Achieved #70 out of 2,200 global submissions in Innovation category developing a UI-based game about AI and real-life problems.
- Designed and implemented complete game mechanics, progression systems, and narrative elements using Godot Engine and GDScript.
- Created interactive elements, breaking 4th wall to create tension and give a strong message to avoid procrastination.
- Demonstrated rapid prototyping and iterative development skills under tight 7-day competition deadline.

Indie Game Developer - Personal Projects

MIT, Manipal, India

Solo Game Developer

[Jan '24 – Present]

- Developed 10+ complete game prototypes across multiple genres demonstrating versatility in game mechanics and design patterns.
- Created advanced FPS Controller System with comprehensive player mechanics: jumping, sprinting, walking, sliding, crouching, wall jumping, wall climbing, wall sliding/running, and mini-map integration. Also implemented God of War-inspired axe throwing and recall mechanics with satisfying player feedback.
- Designed drag-and-shoot mechanics for sports game "Puck Ball Soccer" featuring Soccer Stars (Miniclip) like controls.
- Implemented Flappy Bird remake featuring parallax scrolling backgrounds, restart functionality, and obstacle spawning system.
- Engineered Third-Person Controller with dynamic FOV transitions, dash mechanics, flight system, walking, sprinting, rolling, grappling, .
- Engineered interactive door systems (physical, one/two-way) for an Unreal Engine horror game, including sprint-stamina.

Telecommunications Consultants India Limited (TCIL)

Delhi, India

Engineering Intern

[Jun '25 – Jul '25]

- Acquired in-depth knowledge of Data Center operations, encompassing industry trends, challenges, solution approaches including Disaster Recovery (DR) sites, and Tier Classifications (Tier 1-4).
- Conducted extensive research and analysis on 6G technology, including the global and Indian R&D landscape, designated spectrum, integration of AI/ML, and India's strategic goals for IP/patenting (Bharat 6G Vision).
- Gained practical exposure to high-level strategic discussions, attending Bharat 6G Alliance meetings and understanding organizational methodologies for R&D and patenting roadmap development.

POSITIONS OF RESPONSIBILITY

Robotics and Circuits Team

MIT, Manipal, India

Member, Coding Sub-System

[Jan '24 – Feb '25]

- Led a coding team for the e-Yantra 2024 (IIT Bombay) Logistic Cobot project, to develop a ROS-2 robotic arm simulation with Aruco tags, motion planning, and inverse kinematics, leading to higher leaderboard placement
- Developed an autonomous warehouse carrier bot simulation and built a prototype, featuring obstacle avoidance and optimized path planning. It used LIDAR to detect the surroundings.
- Organized task phases for junior recruits, fostering skill development and project integration within Coding Subsystem

VIRTUAL INTERNSHIPS/ JOB SIMULATIONS

Electronic Arts (EA)

Online

Software Engineering Virtual Internship (Forage) - [Certificate](#)

[Feb '24]

- Architected a new gameplay feature for EA Sports College Football, authoring a comprehensive Feature Proposal
- Boosted application performance by patching a critical bug and implementing a more efficient data structure.

Product Management Virtual Internship (Forage) - [Certificate](#)

[May '24]

- Defined product strategy for RPG game by translating business problems into technical requirements and user stories. Authored a data-driven Product Requirements Document (PRD) by analyzing key performance indicators (KPIs)

CERTIFICATIONS AND EXTRA-CURRICULARS

- **Certifications & Skills:** C, C#, Python, GDScript, Godot Engine, Unreal Engine, Unity Engine, Git/GitHub, FL Studio, Game Mechanics Design, Game Design Documentation

EDUCATION

Manipal Institute of Technology, Manipal (MIT Manipal)

Manipal, Karnataka India

Bachelor of Technology, Electrical and Electronics Engineering

[2023 - 2027]
